-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The claims contain many terms within quotations. It is unclear as to whether this is considered printed matter or whether an operation is occurring in relationship to the quoted matter. The claims are being examined as to printed matter since the specification does not give an explanation of the actual operation occurring. For example, what is "a front ejector pushing"? Is this moving a front portion of an ejector? Is this an ejector at the front of the object? Is this the first ejector pushing?

4. Regarding claims 3-6, the phrase within the parenthesis renders the claims indefinite because it is unclear whether the limitation(s) within the parenthesis are part of the claimed invention.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hehl Pat. No. 5,539,650.

7. Hehl discloses a method of controlling the injection molding machine including setting the injection molding machine control unit (col. 4, lines 51-64). These controls include choosing options for the motion of the cores such as motion P/p during the closing portion of the molding and during the opening portion of the molding, see Fig. 3. Applicant has disclosed that the specific routine setting of the controlling machine is known as shown in applicant's Fig. 3. It would have been obvious to use similar controls of applicant's Fig. 3 in Hehl since both are providing setting up controls for injection molding process. One of the options being "no movement" would have been obvious in Hehl which can move the core in many direction and which the lateral movement may not be desired.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hillman et al. (Pat. No. 5,470,218 shows a similar arrangement of movable cores as Hehl and the setting up of the control system for the movable cores.
